Introducing AgriSciRN the newest SSRN Research Network

Your paper has been included in this new network.

Hello Suresh Lazarus Paul,

SSRN is pleased to announce [AgriSciRN](#), SSRN's new Agricultural Science Research Network, where researchers in the agricultural and related fields can share ideas and other early stage research. This prestigious new area is also SSRN's 60th research network launch! Users can post preprints and working papers and can quickly upload and read AgriSciRN papers, spanning interdisciplinary related content across SSRN research networks and many more granular topics. All for free.

One of your papers, 3496091 *Economic Value of Agro Waste in Developing Countries* , has been selected for inclusion in the AgriSciRN launch as part of the AgriSciRN:

Agroecology (Sub-Topic) area(s). Connections among researchers across disciplines provide different perspectives on similar problems and allow for collaborations.

Congratulations on being selected, and we hope you will share additional papers through SSRN.
